

SECTION A – Multiple Choice (10 marks)

Write the letter of the correct answer on the right side of the number. Each question is worth 2 marks.

1. Which function evaluates one condition and returns one of two results?

- A) SUM
- B) OR
- C) IF
- D) AND

2. The AND function returns TRUE only when:

- A) at least one condition is true
- B) all conditions are true
- C) no conditions are true
- D) the last condition is false

3. Which function returns TRUE if AT LEAST ONE condition is met?

- A) AND
- B) IF
- C) NOT
- D) OR

4. A Nested IF function is best used when a problem has:

- A) only one possible outcome
- B) exactly two possible outcomes
- C) more than two possible outcomes
- D) no possible outcomes

5. In the formula =IF(C3>100, "High", "Low"), the part "Low" is called the:

- A) logical_test
- B) value_if_true
- C) value_if_false
- D) function_name

SECTION B – True or False (10 marks)

Underline TRUE or FALSE for each statement. Each question is worth 2 marks.

1. The OR function requires ALL of its conditions to be true.

TRUE / FALSE

2. A Nested IF function contains more than one IF function inside it.

TRUE / FALSE

3. The AND function returns FALSE if even one of its conditions is false.

TRUE / FALSE

4. The correct syntax for IF is =IF(logical_test, value_if_false, value_if_true).

TRUE / FALSE

5. Every spreadsheet function must begin with an equal sign (=).

TRUE / FALSE

SECTION C – Scenario-Based Questions (10 marks)

Use the table below to answer Questions 1–5. Each question is worth 2 marks.

Cell	A	B	C	D
1	Student	Mark	Attendance (%)	Member
2	John	45	90	Yes
3	Mary	78	60	No
4	Peter	92	85	Yes
5	Anna	55	75	No

1. Write an IF formula that returns **"Pass"** if John's mark (B2) is **50 or more**, otherwise **"Fail"**.

2. Write an AND formula that returns TRUE only if Mary is a **member** (D3 = "Yes") **AND** her **attendance is above 80** (C3 > 80).

3. Write an OR formula that returns TRUE if Peter's **mark is 90 or more** (B4 >= 90) **OR** his **attendance is 80 or more** (C4 >= 80).

4. Write a Nested IF formula that returns:

- **"Distinction"** if Anna's mark (B5) is **75 or more**
- **"Merit"** if her mark is **50 to 74**
- **"Fail"** if her mark is **below 50**

SECTION D – Unscramble the Functions (20 marks)

Instructions: The pieces of each formula have been scrambled. Rearrange ALL the pieces to write the correct formula in the space provided. Each question is worth 5 marks.

1. A worker gets a bonus if their sales (cell B2) are \$5,000 or more. Unscramble the pieces to write an IF formula that returns "Bonus" or "No Bonus".

Scrambled pieces:

| "No Bonus" | =IF(| B2>=5000 | "Bonus" | , | , |) |

Formula: _____

2. A flight is cancelled if there is a storm (cell C2 = "Yes") **OR** the runway is closed (cell D2 = "Yes"). Unscramble the pieces to write an OR formula that returns TRUE or FALSE.

Scrambled pieces:

|) | C2="Yes" | =OR(| , | D2="Yes" |

Formula: _____

3. A student is allowed into the exam hall only if they have their ID (cell E2 = "Yes") AND their name is on the list (cell F2 = "Yes"). Unscramble the pieces to write an AND formula that returns TRUE or FALSE.

Scrambled pieces:

| F2="Yes" | =AND(| E2="Yes" | , |) |

Formula: _____

4. A cinema charges based on age in cell G2:

- Under 12 → "Child"
- 12 to 17 → "Teen"
- 18 and over → "Adult"

Unscramble the pieces to write a Nested IF formula that displays the correct category.

Scrambled pieces:

| IF(G2<=17, | "Teen", | "Adult" | =IF(G2<12, | "Child", |)) |

Formula: _____
