

Name: _____ Date: _____

Class: _____ Teacher: _____

Instructions: Answer ALL questions. Read each question carefully before answering.

Section A: Multiple Choice (1 mark each – 10 marks)

Circle the correct answer.

1. Which technology was used in the **1st generation** of computers?
 - a) Transistors
 - b) Vacuum Tubes
 - c) Integrated Circuits
 - d) Microprocessors
2. The **2nd generation** of computers used which technology?
 - a) Vacuum Tubes
 - b) Transistors
 - c) Microprocessors
 - d) Artificial Intelligence
3. Which generation introduced **Integrated Circuits (ICs)** ?
 - a) 1st Generation
 - b) 2nd Generation
 - c) 3rd Generation
 - d) 4th Generation
4. The **4th generation** of computers is associated with which technology?
 - a) Vacuum Tubes
 - b) Transistors
 - c) Microprocessors
 - d) AI and Parallel Processing
5. What is a key characteristic of **1st generation** computers?
 - a) Small and portable
 - b) Huge, expensive, hot, and slow
 - c) Fast and reliable
 - d) Uses artificial intelligence
6. Which generation introduced **time-sharing** and **keyboards/monitors**?
 - a) 1st Generation
 - b) 2nd Generation
 - c) 3rd Generation
 - d) 5th Generation
7. The **5th generation** of computers is focused on which technology?
 - a) Vacuum Tubes
 - b) Transistors
 - c) Microprocessors
 - d) AI and Parallel Processing

8. Which of the following is an example of a **1st generation** computer?
 - a) IBM PC
 - b) ENIAC
 - c) iPhone
 - d) MacBook
9. Which generation made **personal computers (PCs)** , **GUIs**, and the **internet** possible?
 - a) 2nd Generation
 - b) 3rd Generation
 - c) 4th Generation
 - d) 5th Generation
10. Which of the following is a feature of **5th generation** computers?
 - a) Vacuum tubes
 - b) Voice recognition
 - c) Transistors
 - d) Time-sharing

Section B: True or False (1 mark each – 5 marks)

Write TRUE or FALSE in the space provided.

11. The 1st generation of computers used transistors. _____
12. The 2nd generation of computers was smaller, faster, and cheaper than the 1st generation. _____
13. Integrated Circuits (ICs) were used in the 4th generation of computers. _____
14. The 3rd generation introduced keyboards and monitors. _____
15. Artificial Intelligence (AI) is a key feature of the 5th generation of computers. _____

Section C: Fill in the Blanks (1 mark each – 5 marks)

Complete each sentence with the correct word or phrase.

16. The 1st generation of computers used _____ as their main technology.
17. The 2nd generation of computers used _____ instead of vacuum tubes.
18. The 3rd generation of computers introduced _____ circuits.
19. The 4th generation of computers introduced _____, which made personal computers possible.
20. The 5th generation of computers focuses on _____ and parallel processing.

Section D: Matching (1 mark each – 5 marks)

Match the generation in Column A with its correct description in Column B. Write the letter in the space provided.

Column A**Column B**

- | | | |
|--------------------|-------|--|
| 21. 1st Generation | _____ | a) Microprocessors; PCs, GUIs, internet |
| 22. 2nd Generation | _____ | b) AI, voice recognition, quantum computing |
| 23. 3rd Generation | _____ | c) Vacuum Tubes; huge, expensive, hot, slow |
| 24. 4th Generation | _____ | d) Integrated Circuits; time-sharing, keyboards/monitors |
| 25. 5th Generation | _____ | e) Transistors; smaller, faster, cheaper, more reliable |

Section E: Short Answer (1 mark each – 5 marks)

Write a short answer for each question.

26. Name one example of a 1st generation computer.

27. What does the abbreviation "IC" stand for?

28. List one characteristic of 4th generation computers.

29. What technology is used in the 2nd generation of computers?

30. Name one feature of 5th generation computers.
